Applicant wishes to thank the Examiner for considering the present application. In the Office Action dated February 8, 2005, claims 1-43 are pending in the application. Applicant respectfully requests the Examiner to reconsider the restriction requirement.

The Examiner states that there are five species corresponding respectively to Figures 10, 14, 19, 21, and 22. Applicant respectfully submits that separate patent applications for the various features have been filed. The present application is specifically directed to Figure 19, Species III. Applicant hereby elects Species III corresponding to Claims 1-43. That is, the present claims and application are specifically directed to triling.

Species II corresponding to Figure 14 is specifically directed to a method of applying brake-steer.

Species IV is directed to Figure 21 and is specifically directed to detecting a U-turn and applying brake-steer in response to a U-turn. As mentioned above, this application is directed to triling.

Species V is directed to Figure 22 and is specifically directed to an object detection system. As mentioned above, the present application is directed to applying brake-steer during triling.

Applicant respectfully submits that each and every one of the independent claims is directed to detecting a trailer. Applicant therefore respectfully requests the Examiner to consider Claims 1-43 directed to Species III.
